1ST IBERO-AMERICAN SYMPOSIUM ON
INNOVATION, SCIENCE & TECHNOLOGY

ON-SITE & VIRTUAL FORMAT

NOVEMBER 18–19, 2026

Buenos Aires, Argentina

International Call for Scientific and Technological Papers

CALL FOR PAPERS

English version

Dear participant:

We are pleased to invite researchers, academics, and innovators to submit their work to the 1st Ibero-American Symposium on Innovation, Science and Technology – ITECH 2026, organized by Fundación Instituto Iberoamericano de Tecnología (ITECH). The event will take place on November 18–19, 2026, in Buenos Aires, Argentina, in a hybrid format welcoming both on-site and virtual participation.

ITECH 2026 is designed to bring together researchers, academics, professionals, public institutions, companies, and leading voices from the science and technology ecosystem to showcase advances, strengthen international collaboration, and drive innovation with meaningful social, productive, and regional impact.

SUBMISSION

Submission details

Authors are encouraged to submit abstracts, extended abstracts, short papers, or full manuscripts relevant to the symposium themes. The Scientific Committee will review all proposals, and selected submissions will be incorporated into the official program.

Accepted contributions will receive institutional certification and provide access to networking, knowledge exchange, and international collaboration opportunities with stakeholders throughout the Ibero-American science, technology, and innovation ecosystem.

CONFERENCE TOPICS

Call areas

1

Technology and productive innovation

Innovation, digitalization, and transformation of Ibero-American production systems.

2

Health, science, and emerging technologies

Emerging technologies applied to health, prevention, well-being, and quality of life.

3

Development, society, and sustainability

Science and technology in support of sustainable development and social inclusion.

4

Digital governance and law in Ibero-America

Cybersecurity, data protection, digital sovereignty, and artificial intelligence: regulatory frameworks and ethical challenges.

CONFIRMED AUTHORITIES AND SPEAKERS

Ibero-American Science & Innovation Leaders

Dr. María Cecilia Colautti

President and Founder

Occupational health specialist. Researcher in nanotechnology, nanotoxicity, and industrial processes.

Dr. Thomas Webster

Vice President

Global pioneer in health-oriented nanotechnology and recognized among the most influential researchers in pharmacology and toxicology.

Dr. Jose Vega Varduit

Chair, Scientific Committee

Director of LANOTEC and CeNAT-CONARE in Costa Rica. Latin American leader in scientific innovation, advanced materials, and technology transfer.
